

# P&O Day 2021

## **Matt Frederick**

At my centre we have a range of clinics so I will either be in a paediatric, neuro rehabilitation, or complex/long term conditions clinic. My team has a range of clinics including ward time, diabetic foot, Learning Disability and general clinics.

It's great being able to offer a practical help to someone to help reduce pain, aid their mobility or prevent potential harm. Patients are so grateful for your help and we make a **real** difference to so many lives.

The role is so varied. Every patient has their own story that led them to be referred to Orthotics.
